Cypress Tech Talk

March 12, 2019

MITRE

The Office of the National Coordinator for
Health Information Technology

CMS
CENTERS FOR MEDICARE & MEDICAID SERVICES

Agenda

- Software Updates
 - Cypress Validation Utility + Calculation Check (CVU+)
 - Bring Your Own Patient Feature
 - Upload Patients Demo
- Recent Issues
 - Record Sample Bugs: CYPRESS-1619, CYPRESS-1627, CYPRESS-1629
- Cypress Versions
- Open Discussion
- Contact Information

Cypress Validation Utility + Calculation Check (CVU+)

- **Cypress v5 will include a new set of features called Cypress Validation Utility + Calculation Check (CVU+)**
- **CVU+ seeks to address the vendor concern that the ‘certification process does not mirror a production scenario for electronic Clinical Quality Measure (eCQM) reporting’**
 - Certification uses a constrained set of test patients
 - Certification does not enforce reporting program requirements (i.e., CMS Implementation Guide)
- **CVU+ will supplement the existing certification program**
 - Use of the CVU+ is not currently a requirement of the program

Software Update

CVU+ Feature – Bring Your Own Patients

- **Enhanced verification of a Health IT system's eCQM calculations**
 - Using a combination of Cypress defined patients, and “bring your own” patients
- **Demo feature: QRDA patient upload**
 - A user can upload BYO patient files, specific to a Vendor
 - This will allow them to make CVU+ products with those patients
 - CVU+ products allow for more extensive testing

Software Update

CVU+ Feature – BYO Patients Upload Demo

- When a user is on their Vendor page, they can select ‘Vendor Patients’ to view their Patient List
- From their Patient List, they can choose to import new patients

The screenshot displays two sequential views of the software interface. The top view shows the 'Vendor: My Vendor' page with a 'Vendor Patients' button. A red arrow points from this button to the bottom view, which shows the 'Patient List' page with an '+ Import Patients' button. The breadcrumb navigation in the bottom view is 'Dashboard > Vendor: My Vendor > Patient List'.

Vendor Page:

- Header: cypress 5.0.1 | Dashboard | Master Patient List | Validation Utility | user@mitre.org | Log Out
- Breadcrumb: Dashboard > Vendor: My Vendor
- Content: My Vendor | Vendor Patients | Edit Vendor
- Section: Start EHR Certification with
- Button: + Add Product

Patient List Page:

- Breadcrumb: Dashboard > Vendor: My Vendor > Patient List
- Content: Patient List | + Import Patients
- Text: All Patients
- Text: No patient results for the current criteria.

Software Update

CVU+ Feature – BYO Patients Upload Demo

- A user can import a zip file of patients (using the QRDA Cat I Format), which updates the Patient List with the new patients

The screenshot shows the 'Import Patients' form. At the top, there is a breadcrumb trail: Dashboard > Vendor: My Vendor > Patient List > Add Patient. Below this is a dark green header with the text 'Import Patients'. Underneath, there is a section titled 'Add Patients' containing a 'Choose File' button and the filename 'good_patient...oad.xml.zip'. A red arrow points to the 'Choose File' button. Below the file selection area are two buttons: 'Import Patients' (highlighted in green) and 'Cancel'.

The screenshot shows the 'Patient List' page. At the top, there is a breadcrumb trail: Dashboard > Vendor: My Vendor > Patient List. Below this is a light blue notification bar with an information icon and the text 'Imported 1 patient'. To the right of the notification bar is a '+ Import Patients' button. Below the notification bar is the 'Patient List' section, which includes the heading 'All Patients' and a table with the following data:

Patient Name	DOB	Gender
John Doe	May 11, 1985	Male

Software Update

CVU+ Feature – BYO Patients Upload Demo

- Patient Upload does some basic error checking. When a user imports a zip file with some invalid patient files, only valid patients are added
- The user will see an error message for files that cannot be imported

The screenshot shows the 'Add Patient' interface. The breadcrumb trail is 'Dashboard > Vendor: My Vendor > Patient List > Add Patient'. The 'Import Patients' section has a 'Choose File' button next to the filename 'half_fail_pat...t_upload.zip'. Below this are 'Import Patients' and 'Cancel' buttons. A red arrow points from the 'Import Patients' button to the error message below.

The error message is: 'brokendoug.xml' had errors: 303:0: ERROR: Element '{urn:hl7-org:v3}templateId': This element is not expected. Expected is one of ({urn:hl7-org:v3}entry, {urn:hl7-org:v3}component); 321:0: ERROR: Element '{urn:hl7-org:v3}entry': This element is not expected. Expected is ({urn:hl7-org:v3}component).

Below the error message is a success message: 'Imported 1 patient'. Below that is the 'Patient List' section with a '+ Import Patients' button. The 'All Patients' table is shown below:

Patient Name	DOB	Gender
John Doe	May 11, 1985	Male
Darryl Parker	April 24, 1985	Male

A red arrow points to the 'Darryl Parker' row in the table.

Software Update

CVU+ Feature – BYO Patients Upload Demo

- When a user selects a specific patient, they can view the calculations and HTML rendering for the uploaded patient

Dashboard Vendor: My Vendor Patient List Patient: Darryl Parker

Record Sample Bugs in 4.0.2 patch release

CYPRESS Issue Tracker / CYPRESS-1619

Immunization, administered not complete for Record Sample test

[Export](#)

Details

Type: Bug/Issue Status: IN PROGRESS

Priority: Moderate Resolution: Unresolved

Labels: KnownBug4.0.2 RecordSampleBug

Description

Duplication of issue on [google group](#) for tracking purposes.

Record Sample test for CMS 127v7 may include an Immunization, Administered data criteria. When this is correctly put into a file with the correct code and time recorded, it does not pass. Cypress is looking for an authorDatetime in an element for which there is no authorDatetime. There **shouldn't** be an authorDatetime because as the implementation guide indicates, the effectiveTime element is used for that the authorDatetime element in question.

Recent Issue

4.0.2 Record Sample Bugs

- [CYPRESS-1619](#): Immunization, Administered authorDatetime in Record Sample
- [CYPRESS-1627](#): Substance, Administered template not found in Record Sample submissions
- [CYPRESS-1629](#): Criteria (LDL-c) in CMS105v7 causes error when accessing Record Sample
- **Workaround:**
 - Only necessary if Record Sample Test is generated with problematic criteria
 - That data criteria may be swapped out for any other available data criteria option
 - May reach out to ATL to edit the test and swap this criteria
 - Search with [labels = KnownBug4.0.2 AND labels = RecordSampleBug](#) to find marked relevant bugs

Cypress Versions

Version	Dates	Measures Supported
V 3.2.3	December 14, 2017	Support for the electronic clinical quality measures (eCQM) for the 2018 Reporting/Performance Period *will be supported alongside Cypress v4
V4.0.1	October 11, 2018	Support for the eCQMs for the 2019 Reporting/Performance Period Support for Clinical Quality Language (CQL) calculation
V4.0.2	January 31, 2019	

Bundle Version	Dates	Features
2017.0.3	April 24, 2018	Cypress v3 only "Z1 BH Adult" updated for CMS128v6
2017.0.4	September 25, 2018	Cypress v3 only Errata update to fix 'Download All Patients' feature when 2017.0.3 and 2017.0.2 are installed simultaneously
2018.0.1	July 26, 2018	Cypress v4 only CQL-based measures released in 2018 for the 2019 reporting year eCQM Value Sets as of 5/4/2018.
2018.1.0	October 11, 2018	Cypress v4 only CQL-based measures released in 2018 for the 2019 reporting year eCQM Value Sets as of 9/17/2018.

OPEN DISCUSSION

Next Cypress Tech Talk

- Tuesday, March 26, 2019 at 1pm ET
- To join online, visit:
